MEDICS OPEN AIRWAY ON EMS MANIKIN

What is It?

Vital Sim, Vital Signs Simulator, acquired in 2009.

Purpose:

In the Love County EMS Training Department, ambulance EMTs, Paramedics, and students learn from practicing on the lifelike manikin. In this illustration, medics are administering oxygen therapy to an unconscious patient.

Nasal Airway:

The medic inserts a breathing tube into the nose. The medic squeezes an air pump to send oxygen through the nose and down to the lungs. The air pump mask pressed tightly over the nose and mouth keeps the oxygen from escaping.

Gauge Results:

If the medic performed the procedure properly, the manikin's programmed breathing rate will show improvement.
